By Scott M Britten Air University

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 58 pages. OCLC Number: 54755326 Excerpt: . . . Preface The inspiration for this research occurred long before I entered the Air War College. I became enamored with the possibility of applying reachback operations to air campaign planning and execution after learning how General Charles Horner and his staff overcame tremendous challenges during Desert Shield and Desert Storm to orchestrate an air war unique in human experience. General Horners difficulties convinced me of the absolute necessity of avoiding the problems of survivability, deployability, and supportability for future Joint Air Operations Centers ( JAOC ) through advanced communications and computational technologies. My conviction is certainly not unique, or even original; many talented operators and computer system developers have worked for years to implement geographically distributed data processing for the JAOC. This paper will make two contributions: first, to analyze reachback operations for the JAOC, and second, based on this analysis, to argue for implementing such a system in the near-term using todays technologies and upgrading as appropriate when advanced research and development allows. I was truly amazed at the unstinting assistance I received from many extremely busy people. Foremost...
