It must be remembered that the tabulated calculations are all based on the indicated horsepower of the main engines only, as it was considered better to use only data actually obtained, and afterwards estimated data, such as indicated horsepower of auxiliaries, could be applied without vitiating the observed data and results. No cards could be taken from any of the auxiliaries, but careful estimates give the following results: I. H. p. Air compressor, at 00 revolutions per minute 110 Auxiliary feed pump and two oil pumps, one in intermittent use 30 Dynamos 30 Ice machine 7 Circulating pump 5 Flushing pump 2 Baths, steam tables, evaporator, cooking, etc II Total 195 The steering engine is not used except near port. The size of air compressor was based...
