

Computing, Philosophy and Cognition (Paperback)

By -

College Publications, United Kingdom, 2005. Paperback. Book Condition: New. 228 x 152 mm. Language: English. Brand New Book. ***** Print on Demand *****. This volume is a collection of papers that explore various areas of common interest between philosophy, computing, and cognition. The book illustrates the rich intrigue of this fascinating recent intellectual story. It begins by providing a new analysis of the ideas related to computer ethics, such as the role in information technology of the so-called moral mediators, the relationship between intelligent machines and warfare, and the new opportunities offered by telepresence, for example in teaching and learning. The book also ties together the concerns of epistemology and logic, showing, for example, the connections between computers, robotics, and scientific research and between computational programs and scientific discovery. Important results coming from recent computational models of deduction, the dynamic nature of meaning, and the role of reasoning and learning in spatial, visual and exemplar-based computational frameworks are also addressed. Some stimulating papers carefully study how the interplay between computing and philosophy has also shed new light on the role of rational acceptance in the logic of belief and on the status of old philosophical topics like embodiment and consciousness, the...
