

Biodiversity: An Overview (Hardback)

By -

I K International Publishing House Pvt. Ltd, India, 2011. Hardback. Book Condition: New. 244 x 188 mm. Language: N/A. Brand New Book. India's phytodiversity is one of the most significant in the world. India is one of the twelve mega-biodiversity centers in the world and also an important center of origin of agrobiodiversity. It is therefore, very important to study, document and conserve the plant wealth of India and also of the world before its possible extinction. There are convincing scientific, economic and sociological reasons for giving priority to the conservation of the major centers of plant diversity throughout the world. The strategies to conserve the biodiversity include establishment of protected area network and corridors with emphasis on appropriate levels of management, reduction of anthropogenic pressure on natural populations by cultivating them elsewhere, programmes of augmentation, reintroduction and introduction of target taxa, restoration of degraded habitats, etc. The conservation strategies can be either, in-situ conservation of genetic resources within their ecosystem and natural habitat or ex-situ conservation of components of genetic material of biological diversity outside their natural habitat. The choice of conservation strategy depends upon the nature of the material to be conserved, i.e., the life cycle and...

Reviews

This composed book is excellent. This really is for all who state that there had not been a worth reading through. Your life period will probably be change as soon as you total looking over this ebook.

-- **Cheyanne Barrows**

The book is fantastic and great. I have gone through and I also am certain that I will planning to read through once more once more down the road. Its been printed in an exceedingly simple way and is particularly simply after I finished reading through this publication through which really changed me, change the way I think.
