

Plane Problems in Elementary Geometry, Or, Problems in the Elementary Conic Sections, the Point, Straight Line, and Circle In Two Divisions with an Introduction

Filesize: 2.37 MB

Reviews

This ebook is very gripping and fascinating. Sure, it is engage in, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Ms. Ora Buckridge)

PLANE PROBLEMS IN ELEMENTARY GEOMETRY, OR, PROBLEMS IN THE ELEMENTARY CONIC SECTIONS, THE POINT, STRAIGHT LINE, AND CIRCLE IN TWO DIVISIONS WITH AN INTRODUCTION

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 38 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1871 Excerpt: . . . of this radius will be three points, through which the circle can be drawn. 83. From these principles follow the tables below, which include the fundamental problems already given. The problems of a straight line through two explicit points, and of a circle through three such points, are omitted, as they are not problems of tangency. a. --Tangent Straight Lines. Prob. 52. To draw a Tangent at a given point, on a circle whose centre is known. The solution here given is a useful application of Prob. 43. Thus 1st. Lay off the radius AC, each way from A, and on the circumference. 2d. Through C, and the points p and q thus found, draw indefinite lines, not shown. 3d. From p and q as centres, and radius, AC, of the given circle, draw arcs, and note their intersections with the lines just described. 4th. Join the points thus found, by a straight line, and it will be the required tangent at A. Principles. --These will be perfectly obvious on making the construction. Prob. 53. To draw a Tangent at a given point, on a circle whose centre is not known. Fig. 48. Let abc, Fig. 48, be the circle, and T the given point. Take any arc, Ta, on one side of T, and a double arc, Tc, on the other side. Draw cad, making ad equal to Ta. Then dT will be the tangent required. Remark. --By finding the centre, and drawing the radii...
